SPOTLIGHT ON: CORY LINDER, RECREATION AND PARKS DIRECTOR

After over twenty years working for San Diego County, Cory Linder became the City's Recreation and Parks Director in August, 2013. Cory recently took the time to answer some questions about his work experience and recreation philosophy.

How did you originally get involved in the field of Parks and Recreation?

I literally spent most of my childhood in a park: Eagle Rock Park in northeast Los Angeles to be specific. My Dad worked there as a Recreation Assistant part-time and always worked the late shift, so I went with him. My Dad coached football, basketball, and baseball at this park as well, so if I wasn't helping him work, I was playing on the fields.

You worked for the County of San Diego Department of Parks and Recreation for years. Tell us about your time there.

I started there as an intern back in 1987 before I graduated from College. After graduation, I worked for the City of San Diego for a while then finally got the call from the County to work as a Park Planner. In 24 years I served in 8 different positions ranging from planning, programming, operations and management. I was able to obtain experience in trails, open space management, acquisitions, historical/cultural sites, recreation, interpretation, and much more. I can't thank the County enough for the opportunities and experiences that were afforded to me.

San Diego County has a population of over 3 million, RPV has a population of 42,000. What have been some of the differences in working in such markedly different-sized environments?

SAN RAMON CANYON PROJECT 75% COMPLETE

Work on the San Ramon Canyon Flood Prevention Project is about 75% complete and continues to proceed on schedule. Several significant milestones have been reached ahead of or on schedule. The work of restoring the San Ramon Canyon streambed to its elevation from the City's north boundary to the inlet structure is complete. This involved the import of nearly 38,000 cubic yards of engineered fill, capped with a layer of riprap (large interlocked stones) to protect against erosion of the streambed. The contractor will complete erosion protection by installing landscaping on the

UPDATING THE CITY'S GENERAL PLAN

The City's current General Plan, created and adopted in 1975, is a model of visionary planning that has served the City very well over the past 38 years. Included in the 1975 General Plan are Goals and Policies that have led the way in the type of development activity and resulting physical environment that represents our City today.

Many residents that are not familiar with urban planning jargon may be asking "what exactly is a General Plan?" In short, the California Supreme Court has called the General Plan a City's "constitution for future development". Perhaps a more complete description is found in the State's General Plan Guidelines, which states that the General Plan serves to:

- "Identify the community's land use, circulation, environmental, economic and social goals and policies as they relate to land use and development.
- Provide a basis for local government decision-making, including decisions on development approvals and exactions.
- Provide citizens with opportunities to participate in the planning and decision-making processes of their communities.
- Inform citizens, developers, decision-makers, and other cities and counties of the ground rules that guide development within a particular community."

In 2002, the City Council acknowledged that certain portions of the original 1975 General Plan were outdated and factually incorrect, and that it needed a fresh look. As a first step toward updating the General Plan, the City Council created a 15-member General Plan Update Steering Committee. Between 2002 and 2004, the Committee reviewed the existing General Plan Goals and Policies and determined which needed to be eliminated, revised or maintained, and if any new ones should be proposed. In the end, the Steering Committee determined that while the Goals and Policies needed some revision, their visionary context still holds true both today and in the future.

ABALONE COVE SHORELINE PARK IMPROVEMENT PROJECT COMING SOON!

ABALONE COVE SHORELINE PARK IMPROVEMENTS
85% COMPLETE
MELENDEZ

In December 2011, the City was excited to learn that it would receive a state Land and Water Conservation Fund (LWCF) grant in the amount of \$332,588 for public improvements at Abalone Cove Shoreline Park. The City had proposed a variety of passive recreational improvements to the upper portion of the park, between the main parking lot and the bluff edge. The LWCF grant is a reimbursement program with a 50% City match requirement, thus the total project is estimated to cost \$665,176.

The Abalone Cove Shoreline Park Improvement Project derives from the Council adopted Coast Vision Plan (Vision Plan) and public input from a focus group comprised of community stakeholders. The park improvements will significantly enhance the public's experience at the park, while

HOLIDAY SHOPPING BY THE SEA!

Don't get caught in the mazes and long lines at the anonymous big box stores. The holidays are a busy and stressful time, so make your shopping experience short and sweet. Stop by our cozy gift shop nestled in the lobby of the Point Vicente Interpretive Center and pick up that special gift for friends and family. Visit our gift shop at the Point Vicente Interpretive Center,

located at 31501 Palos Verdes Drive West, next to the Point Vicente Lighthouse. We are open daily from 10:00 a.m. to 5:00 p.m., December 24th and 25th, and New Year's Day. Stop and shop, beat the Christmas rush, and then catch a sunset that department stores can't match!

GENERAL PLAN UPDATE

(Continued from page 1)

The Steering Committee's recommendations, along with a General Plan Update Program, were presented to the City Council in December 2004. At that meeting, the Council directed Staff to move forward with updating the General Plan. Staff then engaged consultants to assist with the preparation of technical studies and in September 2009, the City Council and Planning Commission held a Workshop to provide a "Kick-off" to the General Plan Update process. Since that time, Staff has been working diligently with the Planning Commission on various text revisions and land use changes to bring the General Plan up to date.

At their August 27, 2013 meeting, a milestone in the General Plan Update process was reached when the Planning Commission completed their review of the "Draft" text for the General Plan.

As review of the "Draft" Text has been completed, Staff will now be working on developing text, goals and policies to address Climate Change issues as required by State Law. These items, in addition to any other necessary changes to the "Draft" text, will be reviewed by the Planning Commission through future public hearings. Once these additional updates are completed, Staff will prepare the environmental analysis as required by the California Environmental Quality Act (CEQA).

Upon completion of the CEQA analysis, the "Draft" General Plan Update and CEQA analysis will be brought back to the Commission during a public hearing for final review and recommendation to the City Council. The City Council will then consider and adopt the entirety of the document including the environmental analysis in one or more future public hearings or workshops. Staff envisions that the Council will begin review of the "Updated" General Plan in 2014.

The City encourages all residents to get involved in the General Plan Update process by reviewing the "Draft" updated text, which can be found on the City's website at the following link: http://palosverdes.com/rpv/planning/content/General_Plan_Update.cfm. Additionally, if you would like to be placed on an "interested parties" list to receive future public hearing notices related to the General Plan Update project via e-mail, you may subscribe by joining the City's list serve group, which can be found at the following link: <http://pvalert.com/listserver>.

If you have any questions or comments regarding the General Plan Update, please contact the project manager, Community Development Deputy Director Gregory Pfost, at 310-544-5228 or via e-mail at gregp@rpv.com.

COME EXPLORE THE TIDE POOLS AND TRAILS OF RPV

Screensavers of the Amazon Rainforest are nice to look at on your laptop, but nature in all its glory is available just minutes away! Members of the Los Serenos de Point Vicente docent organization, in addition to their on-going tours of the Point Vicente Interpretive Center, lead free monthly hikes at a number of scenic Peninsula locales. The hikes and tours take approximately two hours, no reservations are required, and parking is free. Rain the night

before or day of the hike cancels the event. Participants should wear comfortable walking shoes, sunscreen and a hat, and bring a small bottle of water. If you attend the hikes at Abalone Cove Beach, sturdy shoes are recommended, as part of the hike will be on cobblestones. For more information about these fun and interesting docent-led nature walks, please call 310-377-5370 or visit the City's website.

ABALONE COVE SHORELINE PARK

Saturday, December 28th - 11:00 a.m.
Sunday, January 12th - Noon
Saturday, February 15th - 2:00 p.m.

Hike down the dirt trail to the beach and tour the tide pools teeming with fascinating marine life. Moderate. The parking fee will be waived for hike participants.

OCEAN TRAILS RESERVE

Sunday, January 26th - 3:00 p.m.

Walk through coastal sage habitat along the eastern bluff of the Reserve. Enjoy coastal views, see WW II sites, and look for gray whales on their annual migration. Moderate. Park on La Rotonda Drive at Twin Harbors View Drive.

RANCHO PALOS VERDES "GREEN CORNER"

You may wonder what the City has been doing lately to be more "green." We're excited to share with you a new focus for our quarterly newsletter. We'll be bringing you "green" news on a regular basis. First up for the "Green Corner" we have the results of the two EDCO / City shredding events and electronic waste roundups for 2013. Between the Spring and Fall events, we had over 1,000 cars come by, dropping off over 39,750 pounds (19.88 tons) of paper for shredding. Over 13,600 pounds (6.8 tons) of electronic waste was collected for recycling. Additionally, over 53,000 pounds (26.5 tons) of high quality mulch was distributed for use in residents' gardens to beautify the City! Reusable grocery bags were distributed to participants, along with EDCO's holiday and special services schedule, and information on storm water pollution prevention. Taking care of our natural resources makes CENTS. These events are tremendously popular with our residents, so keep an eye out for the 2014 event dates and more efforts to keep the City green!

WHALE OF A DAY!

Saturday, March 1, 2014 ~ 10:00 a.m. - 4:00 p.m.
Point Vicente Interpretive Center

31501 Palos Verdes Drive West, Rancho Palos Verdes

"Whale" Away the Hours at the 2014 Whale of a Day!

Watch for whales from our premier whale watch patio and check out some of our exciting activities:

Children's Activities

Crafts, games, fun zone, and face painting.

Arts & Crafts

Marine-themed art exhibits & vendors.

Entertainment

Live music, animals, and more.

Food Booths

Enjoy lunch overlooking the sparkling Pacific Ocean.

Exhibits/Museum

Tour the Point Vicente Interpretive Center.

Lighthouse Tours/Exhibits courtesy of the U.S. Coast Guard.

Free parking and shuttle service at:

Rancho Palos Verdes City Hall, 30940 Hawthorne Boulevard

TIME TO RENEW YOUR BUSINESS LICENSE

A SMALL TOWN WITH A LOT GOING ON

It may come as a surprise that while Rancho Palos Verdes is primarily a bedroom community, there are currently over 2,100 licensed businesses operating in the City. All business activity performed within the City of Rancho Palos Verdes requires the business owner to pay the City's business license tax. This includes any business activity occurring within a residential area (such as a home office). Additionally, any service providers such as contractors, gardeners, or handymen, whether based in the City or not, are also required to be licensed with the City.

Towards the middle of December, the City staff will mail 2014 business license renewal applications to all currently licensed businesses within the City. This application should be completed and returned with payment of the license fee to City Hall by January 31, 2014. Subsequent to processing these renewal applications, a 2014 Business Tax Certificate will be mailed to all businesses that have paid their license fee. Penalties will be assessed on any license applications received on or after February 1, 2014.

IS IT HARD TO FILL OUT A BUSINESS LICENSE APPLICATION?

Not at all! The form is simple, takes only a couple of minutes to complete, and it can be done in either a low or high-tech fashion. You can file on-line by going to the City's website, click on the Finance and Information Technology Department, and scroll down to business licenses. Then, simply follow the step by step instructions. The full web address for business license applications is <http://www.palosverdes.com/rpv/finance/index.cfm#businesslicense>. You can also complete your license application in person at City Hall, inside the Community Development Department.

If you have any questions regarding the renewal process, please contact the Business License Coordinator at 310-377-0360. For additional information about business licenses and taxes, refer to Chapter 5.04 of the City's Municipal Code or visit the City's website.

Whether you're an established enterprise or a hopeful start-up, thanks for your business - we appreciate it!

CITY TEAMS WITH STAFF OFFICIAL TO IMPROVE ELECTRICAL RELIABILITY

In recent years, the Peninsula and South Bay cities—including Rancho Palos Verdes—have experienced an increasing number of power outages. The City has also seen an increase in brush fires related to electrical equipment problems. The largest of these burned 180 acres and threatened homes in 2009. Fires associated with electrical equipment failures pose a serious threat to the lives and property of City residents, as well as to the viability of the City's open space areas.

Following a number of extended power outages in late 2011 and the "Crest" fire in January 2012, the Rancho Palos Verdes City Council began to exert more pressure on Southern California Edison (SCE) to improve the safety and reliability of its infrastructure on the Peninsula. However, progress has been slow and outages continued to occur frequently. It was at this point that the City turned to our State legislators and the California Public Utilities Commission (CPUC) for assistance.

In January 2013, 66th District Assemblymember Al Muratsuchi of Torrance introduced Assembly Bill No. 66 (AB 66) with the sponsorship of the Rancho Palos Verdes City Council. AB 66 was intended to require electrical utilities to identify

and report to the CPUC on the areas of the state experiencing the most frequent and longest outages. This information would be made available on the utilities' websites and would be utilized by the CPUC to direct resources and funding to the geographical areas that are most adversely affected by outages and equipment failures. AB 66 was supported by other Peninsula and South Bay cities that were similarly affected by power outages, as well as by the South Bay Cities Council of Governments (SBCCOG). It was signed by Governor Brown on October 5, 2013, and will go into effect on July 1, 2014.

While AB 66 is expected to provide useful data on the frequency and duration of outages in the coming years, the City remains committed to holding SCE accountable for its promises to address these issues. Recently, Rancho Palos Verdes, SBCCOG and other South Bay cities have reached out directly to the CPUC for assistance, particularly after a September 2013 outage that affected 115,000 SCE customers in the South Bay and on the Peninsula. The City has received a verbal commitment from the President of the CPUC – a former president of SCE – to "escalate" our communities' concerns to higher levels of SCE management.

SAN RAMON CANYON PROJECT (Continued from page 1)

remaining canyon slopes. The landscaping will include establishment of both native shrubs and bushes, as well as hydro seeding, which is the spray application of native plant seed, fertilizer and a binder mix. South of Palos Verdes Drive South, the 1,700 foot cut and cover (traditional excavation) section of the 54-inch storm drain has been installed between the two tunneling pits and the sections of steel pipe have been welded together. The slant drain tunnel, which runs from the top of the bluff to the beach, has been completed, and the lowest 300 feet of the storm drain pipe inside the tunnel has been installed.

In addition, important work continues on the outlet structure at the toe of the bluff, which is being installed to protect the bluff and beach near the outlet. The contractor has installed concrete head and wing walls, which are tied back into the bluff using 40 steel bars of up to 60 feet in length that are bored and grouted into the bluff rock. The 3-foot thick concrete apron on the beach will have large energy dissipating rocks cast into the concrete. When finished, the outlet structure will feature sculpted and stained concrete, allowing it to blend into the naturally occurring bluff face. Work around the inlet structure, located inside the canyon

4,000-feet upstream, also continues, including the inlet foundation, walls and access road from the switchbacks that will allow for maintenance to occur at the upstream end of the pipe.

The most time-consuming and difficult portion of the work is the 2,000 foot rib and lag tunnel, which will contain the upstream portion of the storm drain. Tunnel excavation is difficult and often unpredictable work, and the contractor has experienced some delays due to hard material, complex logistics and equipment breakdowns. However, he has extended his work week and the tunnel excavation should be finished by the end of December.

San Ramon is projected to be completed on time and within the agreed upon price quoted by the contractor. A state grant has been awarded to reimburse the City for 50% of the eligible project costs. The City has received two reimbursement checks from the California Department of Water Resources and has submitted an invoice for the third. The Contractor and City Staff appreciate the patience and overwhelming support of the residents and neighbors during the construction of this important project.

HIKE THE PRESERVE AT NIGHT!

Who says the sun has to be out to go for a hike? "Dancing with the Stars" re-runs can wait. Come walk among the stars and explore the beautiful Palos Verdes Nature Preserve at night instead! Night hikes will be led by Mountains Recreation and Conservation Authority Park Rangers on December 19th, January 30th, February 15th, and March 8th. All hikes take place from 7:00 p.m. to 9:00 p.m.

On these moderate hikes, Park Rangers lead participants through the Portuguese Bend Nature Reserve by moonlight, sharing interpretive information about the Preserve and hiking safety tips.

Preregistration is required. Hike fee: \$7 per person. For more information, please contact the Recreation and Parks Department at 310-544-5260 or parks@rpv.com. Rain cancels event.

BE "CERT"AIN IN AN EMERGENCY!

VOLUNTEERS CONDUCT JOINT EMERGENCY DRILL

Firefighters, Sheriff Personnel and other Public Safety staff are the traditional first-responders in an emergency, but normal, everyday citizens can play a crucial role as well. On October 12, 2013, nearly 150 members of the Community Emergency Response Teams (CERT) throughout the South Bay conducted their annual joint training drill at Point Vicente Park/Civic Center.

CERT members from the Palos Verdes Peninsula and the South Bay spent three hours practicing their full range of CERT skills. The RPV City Hall site was configured for three Search and Rescue venues, two "HazMat" sites, a fire suppression exercise site, medical triage and first aid, and communications training.

CERT is a national program requiring 20 hours of structured training that enables volunteers to handle disaster response activities in their home or community if first responders are temporarily overwhelmed during a major disaster. For more information, please contact Cheryl Dawson at 310-377-8716 or cheryldawson@cox.net.

CORY LINDER (Continued from page 1)

San Diego County is the size of the state of Connecticut, so there is a lot of land to cover and a lot of different communities to deal with. Within the county, I worked with 26 different communities to provide recreation to those locally and regionally by operating over 90 parks and preserves within 50,000 acres. Now, I consider working with just one community refreshing and I feel that I will be able to spend more time focusing on what the community wants and how we can provide that to them.

Tell us about your personal sports and outdoor recreation past (and present):

As I stated before, I grew up in a park, so spending time outdoors is key for me. Whether it's playing sports, hiking, camping, or whatever, I just like being outdoors. I played football, basketball, and baseball throughout my youth and into high school. I found college to be the place where I could further my passion for the outdoors and ultimately obtained a degree in Recreation Management with an Outdoor Emphasis from San Diego State University (Go Aztecs!).

You have extensive experience in managing open space holdings. One of RPV's proudest accomplishments has been the acquisition of over one thousand acres of open space. How would you maintain the natural beauty of the preserve while maintaining access for all?

It's all about balance. It's creating recreational opportunities for the public as well as protecting the resource for generations to come. Managing open space is a delicate balance as you have passionate people, who love the natural beauty of the preserve and the native habitats and wildlife within it. You also have a very active population

who love to hike and ride the trails. Public education and outreach is essential to have mutual respect for all users with the similar goal of preserving the land in perpetuity.

You've had extensive experience in refereeing. How do your experiences as a referee help you in dealing with difficult situations and difficult people?

I kind of fell into officiating basketball in college starting with intramurals and ultimately worked my way to the Division 1 level of college basketball. I think what made me a good referee was watching my Dad every day: how he coached and mentored people, and how he treated everyone fairly. I applied that philosophy out on the court and maintained the goal of being a good, consistent, and fair referee where the players dictated the outcome of the game-not the referees. I carry that same attitude to my career as well. We serve the public. We may not make everyone happy with each project or program, but we try to serve as many people as we can while protecting the resources for generations to come.

The California Parks and Recreation Society has a motto: Parks Make Life Better. Tell us how you think parks can improve life for RPV residents.

RPV is a tight-knit community and very proud of what they have, and where they live. I would love to continue to grow their love of their parks and preserves by offering quality parks and programs in a safe and clean setting. Everyone has their favorite memory of a park or an experience that happened in a park. I want to make sure the City continues that legacy because I truly believe that Parks Make My Life Better!

ABALONE COVE IMPROVEMENT PROJECT

(Continued from page 1)

improving access and the educational experience. The improvements at Abalone Cove Shoreline Park propose to:

- Replace picnic tables and park benches;
- Construct a shade structure;
- Replace trash receptacles;
- Install a drinking fountain;
- Install mutt mitt dispensers;
- Improve trailheads and all trails/paths (including some accessible trails);
- Construct viewing areas;
- Install landscaping and irrigation;
- Create an exploration play area.

Since 2012, City Staff and the project's Landscape Architect have been regularly meeting with

members of the focus group to provide input on the final design, such as the placement and look of the park features listed above. At this time, the project plans are nearly complete and construction is scheduled to occur in early 2014. At that time, portions of the park area and parking lot will be temporarily closed to accommodate construction. The re-opening of the park is tentatively scheduled for late spring 2014.

Information can be found on the City's website for this project. Please join the City's list-serve to receive electronic updates on the project's progress.

HOLIDAY TRASH PICKUP SCHEDULE

EDCO (310) 540-2977 or www.rpvrecycles.com
& Universal Waste Systems (800) 631-7016

December 2013: There is no service on Wednesday, December 25th, Christmas Day. Collection for Wednesday through Friday routes will be delayed by one day that week. No delay for the Monday and Tuesday routes.

January 2014: There is no service on Wednesday, January 1st, New Year's Day. Collection for Wednesday through Friday routes will be delayed by one day that week. No delay for the Monday and Tuesday routes.

February 2014: No change.

Leave all containers at the curb no later than 7:00 a.m. on collection day. **In accordance with the City's Municipal Code, all empty containers need to be removed after collection. Empty carts should not be left on the street overnight.**

RECYCLE YOUR CHRISTMAS TREE

The City recycles Christmas trees as part of its regular green waste recycling program. No special arrangements are needed. Simply leave your Christmas tree at the curb on your regular collection day between December 26th and January 15th. Remove the base, ornaments, tinsel and garland first. No need to cut the tree into smaller pieces (unless it is over 7 feet tall). Flocked trees are acceptable.

If you live in a multi-family complex, ask your management company or HOA about the designated drop-off location. This location is typically in the garage area or by the recycling bins.

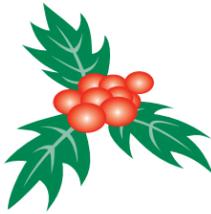

DECEMBER FREE HOLIDAY EXCESS TRASH COLLECTION

EDCO and UWS offer free excess trash collection for three weeks during the December holiday season (December 26th to January 15th). During that time, in addition to your weekly trash placed in the grey cart, you may also temporarily place excess trash in your old standard-size cans and/or in plastic bags, etc. No loose material will be accepted. Empty gift and cardboard boxes can be flattened and placed next to your blue recycling cart(s) for collection. Don't forget to recycle your shipping and gift boxes, and place your gift-wrap paper in the blue cart.

BULKY ITEM & E-WASTE COLLECTION:
EDCO and UWS offer customers' free

(limited) collection of bulky and electronics items such as sofas, TVs, computers, mattresses, desks, etc. Call to arrange for a collection schedule. If your item is in good shape and could be re-used, please contact a charitable organization first.

BACKYARD SERVICE: EDCO and UWS provide backyard service to customers at an additional monthly charge. If you have physical constraints, are a senior, travel out of town frequently, or have a disability, please call EDCO or UWS

BATTERY RECYCLING AT PARK SITES

Used batteries are considered hazardous waste and should not be placed in your trash or recycling carts. Specifically marked battery recycling containers are available at various park sites including Hesse Park, Ryan Park, Point Vicente

Park (Civic Center), Point Vicente Interpretive Center (PVIC) and Ladera Linda. Ask the park staff for their location. Batteries will then be recycled appropriately at a certified facility.
