City of Rancho Palos Verdes Community Development Department Building and Safety Division (310) 265-7800 buildingsafety@rpvca.gov

Construction and Demolition Debris Waste Management Plan RESIDENTIAL and NON-RESIDENTIAL PROJECTS -DIVERSION REQUIREMENTS

Requirements

Pursuant to the California Green Building Code (2019 CALGreen), the City of Rancho Palos Verdes requires diversion of construction and demolition waste from residential construction and demolition projects. The project types and diversion requirements are:

PROJECT TYPE	CRITERIA	REQUIRED DIVERSION					
RESIDENTIAL							
New Construction (all permitted	Low Rise (3 stories or less)	A) Equal to or greater than 65% diversion, <u>OR</u> B) Disposal of less than or equal to 3.4 pounds per square foot					
structures)	High Rise (4 stories or more)	A) Equal to or greater than 65% diversion, <u>OR</u> B) Disposal of less than or equal to 3.4 pounds per square foot					
Additions (all permitted projects)	Any addition that increases the building's conditioned area, volume or size [requirements only apply to and within the specific area of the addition]	Equal to or greater than 65% diversion					
Alterations	Any alteration that increases the building's conditioned area, volume or size [requirements only apply to and within the specific area of the alteration].	Equal to or greater than 65% diversion					
Demolition Only (all permitted structures of any size)	Structure is defined by the CA Building Code as that which is built or constructed. Applies to buildings designed for occupancy.	Equal to or greater than 65% diversion					
	NON-RESIDENTIAL						
New Construction (all permitted structures)	All permitted structures of any size (does not include additions, alterations or repairs)	A) Equal to or greater than 65% diversion, OR B) Disposal of less than or equal to 2 pounds per square foot					
Demolition only	All permitted projects of any size	Equal to or greater than 65% diversion					
	Less than 1,000 sq.ft.	Equal to or greater than 65% diversion					
Additions	1,000 sq.ft. or greater	A) Equal to or greater than 65% diversion AND B) Universal Waste (i.e.batteries, e-waste, lamps, cathode ray tubes/glass, aerosol cans) must be managed properly and diverted from the landfill.					
	Less than \$200,000 valuation	Equal to or greater than 65% diversion					
Alterations	Equal or greater than \$200,000 valuation	A) Equal to or greater than 65% diversion AND B) Universal Waste (i.e.batteries, e-waste, lamps, cathode ray tubes/glass, aerosol cans) must be managed properly and diverted from the landfill.					
Soil Excavation and Land Clearing	All permitted soil excavation and land clearing projects	100% of trees, stumps, rocks, and associated vegetation and soils resulting from land clearing (Exception: Reuse, either on or off-site, of vegetation or soil contaminated by disease or pes infestation).					

City of Rancho Palos Verdes

Construction and Demolition Debris Waste Management Plan (WMP) RESIDENTIAL and NON-RESIDENTIAL PROJECTS INSTRUCTIONS

Pursuant to the California Green Building Code of 2019 (2019 CALGreen), the City of Rancho Palos Verdes requires diversion of construction and demolition (C&D) debris from residential and non-residential construction and demolition projects.

You have received this packet because your project must meet the recycling standards identified by the 2019 CALGreen thresholds.

The contents of this packet constitute a Waste Management Plan (WMP). This packet is designed to track the amount of C&D debris diverted or disposed for your project and is to be submitted to RPV Building & Safety to demonstrate compliance with CALGreen requirements.

A Waste Management Plan is to be submitted to RPV Building & Safety, otherwise your demolition/building permit will **NOT** be finalized.

Step 1: Complete Forms A and B

Form A is the **PROJECT INFORMATION** form. This form asks for basic project information, such as type, description, size, valuation, and applicant contact information.

Form B is the **PRE-PROJECT WORKSHEET** form. This form asks for estimated amounts of debris that will be generated by the project.

<u>Option 1:</u> If you are electing to contract with hauler(s) from the RPV **Authorized Hauler** list and/or facilities from the **Facility Info** list who will handle recycling compliance on your behalf, complete **Form B (simple form)**.

<u>Option 2:</u> If you will be handling all waste management activities (through the use of your contractor's own bins, or extensive reuse), complete **Form B1**. Estimate the weight of the C&D debris, by material type, that will be recycled, reused, salvaged, disposed and/or transformed from your project.

You must complete either Form B (simple form) or Form B1.

Step 2: Submit Forms to Building & Safety

Forms A and **B** (or B1) must be submitted and approved before you can obtain a demolition or construction permit from the City of Rancho Palos Verdes.

Step 3: Complete POST-PROJECT SUMMARY - FORM C

At least 5 business days prior to final inspection, submit a completed **FORM C** to Building & Safety at buildingsafety@rpvca.gov. Weight tickets must be attached whether you use an authorized hauler, or use your contractor's own bins to haul away.

NOTE A FACILITY INFO list showing nearby companies that accept C&D materials for recycling is included in this packet. This list was developed to assist you in finding local facilities to use as an alternative to disposal. If you use a certified mixed C&D processing facility, your project will meet the diversion requirements.

There are authorized haulers that do business in Rancho Palos Verdes. The **HAULER LIST** showing companies that are authorized to collect solid waste in RPV is included in this packet. You must use one of these haulers if contracting for waste removal service.

For your convenience, there are electronic versions of the forms that will automatically calculate waste generation, disposal, and diversion based on the data entered.

EXEMPTION: If you believe your project cannot achieve the required diversion, you must complete and submit **Form D**, the **EXEMPTION REQUEST** form, to the City explaining the circumstances, and requesting an exemption from the requirements.

Must Be Completed Prior To Permit Issuance

City of Rancho Palos Verdes

Community Development Department Building and Safety Division (310) 265-7800 buildingsafety@rpvca.gov

FORM A - PROJECT INFORMATION ALL PERMITTED RESIDENTIAL AND NON-RESIDENTIAL PROJECTS

This form must be completed and approved or a demolition/building permit will NOT be issued

Pursuant to the California Green Building Code (2019 CALGreen), the City of Rancho Palos Verdes requires that contractors/homeowners complete a Waste Management Plan (WMP) for the reduction of waste produced from demolition and construction work performed within the City. City staff will provide assistance in developing and implementing the Waste Management Plan. If you have any questions regarding these requirements, please contact your assigned City Planner or Inspector first.

City of Rancho Palos Verdes Community Development Department Building and Safety Division (310) 265-7800 buildingsafety@rpvca.gov Plan Check No.:________ Date:________

Form B (Simple Form) - PRE-PROJECT WORKSHEET ALL PERMITTED RESIDENTIAL AND NON-RESIDENTIAL PROJECTS

USE RPV's AUTHORIZED HAULERS

Instead of completing a detailed accounting of the types and quantities of C&D debris that will be generated from this project (FORM B1), you have the option to select one of RPV's authorized waste haulers. These haulers can handle your project's debris in such a way as to comply with CALGreen recycling standards.

If you elect this option, please specify which authorized hauler(s) and/or facility(ies) you will be using and sign the acknowledgement below.

It is your responsibility to ensure that the hauler knows you are contracting for "C&D Recycling Service" so that the material is properly handled and waste diverted. You need to obtain weight tickets from the hauler indicating the type and weight of the material collected.

In order to comply with the requirements of this WMP, I will contract with the following hauler(s):

(Names are in alphabetic order. Place a check next to the company or companies that you will contract with for this project)

CalMet Services

California Waste Services (CWS)

Consolidated Disposal (aka Republic/Allied Waste)

EDCO Disposal (EDCO)

Universal Waste Systems (UWS)

Waste Management - L.A. (WM)

West Coast Rolloff

I understand that I am responsible for obtaining copies of any and all weight tickets from all haulers and/or all facilities which receive debris from this project and that I will submit a Post-Project Summary (FORM C) at least 5 business days <u>prior to final inspection</u>.

Project Site:	

Form B1 - PRE-PROJECT WORKSHEET ALL PERMITTED RESIDENTIAL AND NON-RESIDENTIAL PROJECTS

Complete this form if you elect <u>not to use</u> a RPV authorized hauler USE OF OWN COMPANY'S BINS

In the table below, list estimated weight of debris, by material type, that will be generated, recycled, reused, salvaged, disposed, and/or transformed by this project. You must include the facility(s) and all recyclers, salvage companies, recycling facilities, mixed use material recovery facilities, landfills, and/or transformation facilities that will be used for this project.

To estimate **GENERATION (1)**, enter estimates either in volume (cubic yards, CY) or weight (tons, T) for each material type that will be handled by the project. If you do not know weights, you must calculate the weight by multiplying the volume by the conversion factor, then dividing the pounds by 2,000 to get tons.

After generation is estimated, enter the estimate for **DIVERSION (2)** for each material type that will be handled by the project. This can be split between recycling and reuse/salvage.

The difference between generation and diversion is **DISPOSAL (3)**. If no diversion will take place for a material type, then disposal will equal the generation amount for each material type. If only a portion of the material will be diverted, then the remainder will be disposed.

If a Mixed C&D Processing facility is to be used, enter the estimated volume to be delivered to the facility, the recycling rate for that facility, and the subsequent recycling and disposal estimates.

To estimate the project's DIVERSION RATE (D), divide the total of all DIVERSION (B) by the total of all GENERATION (A) and multiply by 100.

	GENERATION (1)	DIVERSION (2)		DISPOSAL (3)			
MATERIAL TYPE	Total Tons to be	Tons to be	Tons to be Reused or Salvaged	Total Tons Recycled, Reused, or Salvaged	Commingled & Sorted Offsite (Off); or Source Separated On-Site	Total Tons to be Disposed and/or Transformed	Name of Hauler and/or Facility

These facilities are certified by the City of Los Angeles and/or County of Los Angeles to attain a minimum of 65% diversion.

Always call the company first, as information is subject to change, and some facilities may take only a specific type of material.

The City of Rancho Palos Verdes is not liable for any errors, omissions or changes on this list, nor does it guarantee the accuracy of any information regarding materials, services or products. These are privately-owned facilities and not affiliated with the City of Rancho Palos Verdes or the City of Los Angeles or the County of Los Angeles. The list is not intended to be exhaustive, but has been developed to assist contractors in finding conveniently located recycling facilities as an alternative to disposal.

Rev. 1/22/19 6

^{*} Please call facility for diversion rate. Rate is not certified by City of Rancho Palos Verdes, City of Los Angeles or County of Los Angeles. Must provide documentation of recycling rate with submittal of Form C.
