

### NCCP/HCP 30-Day Re-circulation for Public Comment

The U.S. Fish and Wildlife Service (Service) is recirculating the Draft Environmental Assessment associated with the Draft City of Rancho Palos Verdes NCCP/HCP and associated documents for an additional 30-day public comment period. This additional public comment period will begin April 4, 2019, and end May 6, 2019. The Service is extending the public comment period, in part, due to the recent government shutdown and to maximize public review. The Draft City of Rancho Palos Verdes NCCP/HCP provided on the City's website during the previous 60-day public comment period was the version of the document considered by City Council at the March 29, 2018, City Council Meeting; however, it did not include changes accepted by City Council via late correspondence at the City Council Meeting, nor did it include technical and clarifying edits to the draft made after the March 2018 City Council Meeting. The City is providing two versions of the documents for the 30-day public review. The first is a clean copy of the documents, which includes all changes, and the second is a copy of the documents with tracked changes. The Service and California Department of Fish and Wildlife are evaluating the City Council-approved Draft City of Rancho Palos Verdes NCCP/HCP and associated documents and are seeking public comment in accordance with their permit decision processes. Comments submitted during the first comment period will be addressed, therefore it is not necessary to resubmit the same comment during this public review period.
