

## **LADERA LINDA SECURITY ANALYSIS**

Neighbor concerns about security have been clearly heard. As has been noted previously, the existing park and community center layout has poor overall security due to its multiple buildings and access points, poor sight lines, numerous blind spots, and overgrown landscaping. The security plan will be more fully detailed during the construction design phase, pursuant to Council direction.

While the security design will be formalized during the construction design phase, below is a short list of the ways security will be addressed:

- greatly-simplified single building design,
- appropriately-placed security cameras,
- appropriate low-level landscaping,
- control of ingress and egress points,
- comprehensive best-practices lighting design throughout park and building
- increased staffing presence
- ability to secure park perimeter at night through fencing and improved entrance gates.
- reduction/elimination of blind spots

The refined schematic design being presented to Council on August 20<sup>th</sup> will include additional, enhanced security details.
